Safety Above All Else

Jeff Birkeland, CEO

jeff.birkeland@wce.coop

According to the Electrical Safety Foundation, each year thousands of people in the United States are critically injured and electrocuted as a result of electrical fires, accidents and electrocution in their own homes. Many of these accidents are preventable.

“Safety” is a universal word that is mentioned often and used loosely. Communities large and small as well as companies across all industries are committed to safety. Sports leagues, at every level, take safety seriously. Unfortunately, when it really counts, steps to keep the public, workers, athletes and loved ones safe are often ignored in the interest of expediency or convenience.

However, safety is a serious issue, especially when it comes to electrical safety. For West Central, it’s the number one priority. This is not empty talk. Over time, West Central has created a culture of safety by putting our employees’ safety and that of the community above all else. At its essence, our mission is to provide safe, reliable services to our member-owners. At the end of the day, we strive to deliver affordable and reliable electricity to our member-owners, but equally important, we want to return our workers home safely to their loved ones. To do this requires ongoing focus, dedication and vigilance.

Following leading national safety standards

Working with electricity is an inherently dangerous job, especially for lineworkers. West Central has a safety team whose focus is keeping employees and the community safe around electricity. We established and follow safety protocols based on leading national safety practices for the utility industry. We require our lineworkers to wear specialized equipment when working next to or with power lines. There are specific protocols that our lineworkers follow when dealing with electricity. Our safety team has regular meetings where they discuss upcoming projects from a safety perspective. They monitor and track near-misses of accidents in order to understand them, share “lessons learned” and improve in the future.

Just as importantly, we encourage all of our crews to speak up and hold each other accountable for safety. By cultivating a culture of openness and transparency, we promote problem-solving with regard to safety, rather than defaulting to a blame game. We examine the information and data gleaned from near-misses and accident reports to discern patterns and use safety metrics to improve in those areas where we have fallen short. As appropriate, we brief contractors on our safety protocols and set expectations for their engagement.

Keeping the community safe

Because we live and work in the community we serve, we care about our neighbors. West Central conducts electrical safety demonstrations in schools, for fire departments, and for many other community events.

May is National Electrical Safety Month. According to the Electrical Safety Foundation, each year thousands of people in the United States are critically injured and electrocuted as a result of electrical fires, accidents and electrocution in their own homes. Many of these accidents are preventable. There is much you can do to keep yourself and your community safe around electricity.

Don’t attempt electrical DIY projects or overload your outlets. Report downed power lines, broken poles, unlocked padmount transformers or anything else that may look amiss. Contact us for additional electrical safety tips or if you would like us to provide a safety demonstration at your school or community event. Be mindful when it comes to electrical safety. Pause and take the extra time to plug into safety.

Design assistance by SDREA

West Central Electric Awards Scholarships to Area Youth

Chase Barnes

Chase Barnes – My parents are Todd and Krysti Barnes. I have been a lifelong resident of Murdo, S.D., and have ranched all of my life, working with cattle and training horses. I will be graduating from Jones County High School, where I participated in multiple sports and activities. I plan to pursue an education at Mitchell Technical College in the fall of 2021 to attain a degree in power line construction and maintenance.

Myles Clements – I am from Philip, S.D., and am the son of Tom and Lacey Clements. I am a senior at Philip High

School and will be graduating in May. The sports I have been involved in include both football and rodeo. I have also been involved in school and community organizations such as FFA, FCCLA, choir and 4-H. I plan on attending Michell Technical College, majoring in electrical construction and maintenance.

Myles Clements

Jadyn Coller – My name is Jadyn Coller. I am the son of Heidi and Sauntie Coller, and the second of four children. My family owns and operates an excavation business which has always been my passion. Working along side my dad, I operated CAT machinery. I have been accepted into the Think Big program at Lake Area Technical College. I plan to pursue a degree in diesel technology while having the opportunity to work at Butler CAT.

Jadyn Coller

Haleigh Elwood – Hello, my name is Haleigh Elwood, and I am a senior at Lyman High School. I live on the family ranch outside of Reliance and will be attending Mitchell Technical College pursuing a degree in business management this fall. Throughout high school, I have participated in rodeo and showing cattle, goats and horses. I have also been in volleyball, golf, a wrestling and basketball stat, student council, FFA, band, choir, oral interpretation and the school play.

Haleigh Elwood

Keldon Fitzgerald – My name is Keldon Fitzgerald and I am currently a senior at Philip High School. My parents are Jake and Aaron Fitzgerald and I have one brother and a sister. I have been involved in many school activities including basketball, football, golf, FFA, FCCLA and choir. I plan on attending South Dakota State University this coming fall to pursue a degree in ag business. In my free time, I enjoy golfing and being outdoors with friends and family.

Keldon Fitzgerald

Jorge Garcia – I am the son of Jose and Argelia Garcia and attend Stanley County High School. I has been involved in basketball, football and the track team and am a member of the National Honor Society, Spanish Honor Society and National Society of High School Scholars. I plan to attend the University of South Dakota in their pre-medicine program, with a focus on a biology degree.

Jorge Garcia

Remodeling? Keep Efficiency in Mind

Sunny days are prime time for tackling remodeling projects, upgrades and repairs around your home. If you're planning a project, make a point of adding energy efficiency features along the way. Here are a few ideas:

- Add insulation around recessed lights so heated or conditioned air doesn't leak out of them and the weather can't sneak in.
- Install programmable thermostats when you add rooms to the house. While you're at it, have the thermostats in the rest of your home upgraded to programmable models.
- Your contractor will install more insulation in any new spaces you're adding than your builder did during the original construction of your home. Consider adding insulation to already-insulated areas, like the crawlspace and attic, to meet new energy efficiency standards.
- A new kitchen means shiny new appliances. Select those rated as energy efficient by ENERGY STAR®, which use less energy than unrated models.
- If your older home still has single-pane windows, consider an upgrade. Double-pane windows are more energy efficient because they better shield your home from the outdoors - and keep your conditioned air indoors.
- Replace old lightbulbs in your most-used rooms with LEDs. They last 10 years or longer and save considerable energy when compared to incandescent bulbs.
- Work with a contractor who understands how passive solar design can affect your energy bills. Rooftop solar panels, sunrooms and skylights are popular additions.
- Add or upgrade ventilation fans in bathrooms. This can improve air quality throughout the home - not just in the bathrooms - by removing moisture from the air.
- Consider having a home energy audit conducted. Audits can help you evaluate your home for energy wasters, suggest ways to remedy inefficiencies and recommend additions that will make your house more comfortable and cheaper to heat and cool.

Generate Safely.

Never use a portable generator indoors.

Do not plug generators into standard electrical outlets.

Use heavy-duty extension cords to connect appliances into the generator.

Start the generator before connecting appliances.

KIDS CORNER SAFETY POSTER

Don't Grill Too Close to the House

Mia Phillips, 5 years old

Mia is the granddaughter of Jim and Hans Moore of Rapid City. They are members of Black Hills Electric.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

A Craving for Casseroles

Chicken and Rice

- | | |
|---------------------------------|--|
| 1 bag Success Brown Rice | 1/2 package (4 ounces) mushrooms, sliced |
| 1/2 cup ricotta cheese | 1/4 cup white wine |
| 1/4 cup grated Parmesan cheese | 4 cups baby spinach leaves |
| 1 tbsp. chopped Italian parsley | 2 cups shredded, cooked chicken breast |
| 1 tbsp. olive oil | 1/2 tsp. salt |
| 1/3 cup chopped onions | 1/2 tsp. black pepper |
| 2 garlic cloves, minced | |

Prepare rice according to package directions. In small bowl, combine ricotta, Parmesan and parsley; reserve. In large skillet over medium heat, heat oil. Add onions and garlic; saute 2 minutes. Add mushrooms and wine to skillet. Continue cooking 3 minutes, stirring occasionally. Add spinach and chicken. Stir until spinach is wilted and chicken is heated through, about 2 minutes. Stir in rice, salt and pepper. Serve casserole topped with dollops of reserved cheese mixture.

SuccessRice.com

Meat Lovers Pizza Casserole

- | | |
|--|--|
| 1 lb. ground beef | 2 c. (8 oz) shredded mozzarella cheese |
| 1 medium onion, chopped | 1 pkg (3 1/2 oz) sliced pepperoni, quartered |
| 1 can (15 oz) pizza sauce | 1/2 tsp. salt |
| 8 oz. elbow macaroni, cooked and drained | |

In a large skillet, cook ground beef and onion over medium heat until meat is no longer pink; drain. Stir in remaining ingredients. Transfer to a greased 2-quart baking dish. Bake uncovered at 350 degrees for 40-45 minutes or until heated through. Yields 6 servings.

Gail Lee, Brookings

Chicken Doritos Casserole

- | | |
|--------------------------------|--|
| 2 cups shredded cooked chicken | 1 can Ro-tel tomatoes, drained (canned tomatoes with jalapenos-mild) |
| 1 cup shredded cheese | 1/2 packet taco seasoning (or more, to taste) |
| 1 can cream of chicken soup | 1 bag of regular nacho cheese Doritos |
| 1/2 cup milk | |
| 1/2 cup sour cream | |

Preheat oven to 350 degrees. In a mixing bowl, combine all ingredients except Doritos. In a greased 2 quart baking dish, put a layer of crushed Doritos (about 2 cups), then a layer of the chicken mixture. Top with more shredded cheese, cover, and bake 30-35 minutes until bubbling hot. Enjoy!

Alana Neville, Milesville, SD

Garden Cafe Casserole

- | | |
|-------------------|---|
| 1 bag hash browns | 1/2 lb. deli turkey (cut in pieces) |
| 1 onion | 1 lb. bacon (fried and cut in pieces) |
| 1 green pepper | 2-3 cups cheese (Monterey Jack, Colby, Cheddar) |
| 1 box mushrooms | |
| 1 tomato | |

Place thawed hash browns in the bottom of a 9 x 13 pan. Saute onion, green pepper, and mushrooms. Place the meat and tomato on top of the potatoes. Then onion, green pepper and mushrooms. Top with cheese. Bake at 350 degrees for one hour.

Joanna Gum, Clear Lake, SD

Please send your favorite dairy recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2021. All entries must include your name, mailing address, telephone number and cooperative name.

Three Ways to Save Energy Outdoors

Pat Keegan

Collaborative Efficiency

Whatever you choose, make sure it is rated for the size of the space you are cooling.

Pat Keegan and Brad Thiessen of Collaborative Efficiency write on energy efficiency topics for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives. From growing suburbs to remote farming communities, electric co-ops serve as engines of economic development for 42 million Americans across 56 percent of the nation's landscape. For additional energy tips and information on Collaborative Efficiency visit: www.collaborativeefficiency.com/energytips.

Dear Pat and Brad: During summertime, the deck becomes our kitchen, and my wife and I spend most of our free time in the backyard. We've invested a lot of time and effort making the interior of our home more energy efficient, but we're wondering if there are ways we can save energy outdoors as well. – Josh

Dear Josh: The most common way to save energy during summer months is lowering your cooling costs indoors. Since you and your wife are spending a lot of time outdoors, you can certainly save energy and money by reducing your air conditioning use inside. Setting the thermostat just a few degrees higher can make quite a difference. But to answer your main question, yes - there are ways to save energy outdoors. Here are three:

Pumps and Maintenance

Many of us have one or more pumps that service our yard or reside on our property. Pumps can supply water for a swimming pool, your lawn and garden, or your septic system or well. It's easy to let maintenance slip, which cuts the pump's efficiency and shortens its life.

Maintaining pumps involves cleaning the filters or checking oil and belts. If you have multiple pumps and need to hire a professional for assistance, try to do all the maintenance at once to reduce the overall cost. You may also want to consider replacing older pumps with energy efficient ENERGY STAR®-rated ones before they break down. While you're at it, check for leaks in the water lines, which make your pumps work harder and longer.

Outdoor Lighting

If you have security lighting, there's a good chance you can save a little energy. Some security lights can be 500 to 1000 watts. That's the equivalent of 40 to 80 indoor LED bulbs - quite a lot of energy! Adding timers, motion sensors and light sensors can reduce your bulb energy use. Plus, when you use your lights less often, your neighbors may appreciate a little less light pollution!

Switching to LEDs is another great strategy. Solar lights are also a good way to light walkways, a water feature or your deck - without having to buy any electricity at all.

Grilling

Using your oven can raise your kitchen's temperature up to 10 degrees, increasing the need for running your air conditioner, so grilling outdoors is a great way to save energy. If you like to barbecue or grill most of your meals, you may want to consider the fuel you use. If natural gas is available, it's usually much less expensive than propane. Natural gas is also convenient because you don't have to refill any tanks like you would with propane. On the downside, if you don't already have gas lines running to your patio or deck, the cost of installing them can be prohibitive.

Other fuel types like charcoal briquettes or wood take more preparation and can be fussy to work with, and charcoal grills emit three times as much carbon as gas grills.

Whichever fuel type you choose for your grill, you can save energy by barbecuing (keeping the lid closed during cooking) rather than grilling (cooking with the lid off at higher heat).

Hopefully these ideas will help you enjoy your outdoor living space this summer - and help you save energy!

Grilling outdoors is an excellent way to save energy.

Cole Sonne's YouTube Channel Makes Farm Life Look Like a Visit to Disneyland

Billy Gibson

billy.gibson@sdrea.coop

Every day on the farm is a new adventure for Cole Sonne. While many 20-somethings contemplate leaving their family homesteads in search of a more urbane and sophisticated lifestyle, Sonne has no intention of giving up the farming life.

His enthusiasm for agriculture is in his blood and in his soul. But it's also all over the internet.

There is perhaps no more effective web-based advocate for South Dakota agriculture than Sonne, as evidenced by his audience of more than 145,000 YouTube subscribers. Sonne's 250 video posts have received over 26 million views since he created his YouTube channel two years ago.

After earning a degree in agronomy from South Dakota State University, Sonne returned to the family farm near Mount

Cole and his father Brian exchange some friendly sniping on the channel.

Vernon and it wasn't long before he had a notion to let the world see how fun and adventurous farming can be.

He saw that some ag-based channels created by young farmers such as Minnesota Millennial Farmer and Farm Life SD were growing in popularity, so he figured he'd take a shot at posting videos of all the wild and sometimes wacky situations that can emerge during a typical day.

"It's really informational and entertaining at the same time," said Sonne, a fourth

Fourth generation farmer Cole Sonne has amassed more than 145,000 YouTube subscribers.

generation farmer. "I think it's important to teach people who have never done this what farm life is really like.

The genesis of the channel came after he bought a drone and started taking aerial shots of raking hay and feeding cattle, but he didn't know what to do with the footage. He started posting his videos and then thought about capturing some of

the dialogue that takes place between him and his father, Brian, and other family members. The animals, machinery, chores and weather conditions never fail to create intriguing scenarios that keep fans tuned in.

Sonne was surprised when the viewer count started to skyrocket.

"It just took off right away," he said. "I call it ag

advocacy. We just show people what we do from day to day and try to make it as fun as possible.

Much of the witty repartee is exchanged between Sonne and his often exasperated father. As Sonne had his camera rolling and capturing a farm task that wasn't going well recently, Brian grumbled, "To me this is embarrassing. To you it's good footage."

The conversation in that episode ran the gamut from Halle Berry to woodpeckers to classic Saturday Night Live skits as the

duo went from gathering hay to scraping manure. Sonne says the near constant laughing, joking and friendly sniping keep things light-hearted as they take care of their business.

Asked which of his videos has received the greatest amount of attention, Sonne is quick with his response.

"A video we did last April got more than one million hits," he said. "There was an approach to a field that was holding back water and we had to dig it out and release the water and put in a culvert. When we pulled the last grab of dirt that was holding a year's worth of water, the water just came gushing through. People seemed to really like seeing that large volume of water. A lot of what's going to get the attention is the thumbnail picture. If you can get the perfect thumbnail, people will click on it."

Apparently, the video titles also help to attract eyeballs. Some recent titles include: "Cole got splattered with poo," "Watch out - angry calf hits Brian and Jeff," "We saved him - moments from the end."

As for the time and dedication it takes to keep content fresh for thousands of eager viewers, Sonne said he considers it just another item on a lengthy list of tasks that every farmer has.

"It usually takes a couple of hours to get the videos done," he said. "I'll farm all day, come home and start editing and work til late at night. That's what most farmers do anyway. You have to balance things out."

The AgritourismSD program blends the state's top two economic drivers: agriculture and tourism. Photos provided by SD Tourism.

AGRITOURISM

New Program Blends South Dakota's Top Two Economic Drivers

Billy Gibson

billy.gibson@sdrea.coop

Amy Kruse already had a baby before she actually became a mother. That baby was proudly named Circle View Guest Ranch. That's the bed and breakfast establishment in Interior run by Amy and her husband, Philip.

"Before I had three kids, this was my baby," Kruse said on a recent Thursday afternoon while taking a break from getting the nearly 3,000-acre ranch spiffed up for weekend visitors and the busy travel season. "I got out of college and we got married and we came here 18 years ago. It's a lot of work to operate the ranch and make things run to give our guests a memorable experience, but it's worth it to see them enjoy themselves and have a great time in South Dakota."

While Kruse has long been engaged in her own form of what's called agritourism, she's an enthusiastic supporter of a new initiative designed to promote the accelerated growth of more agritourism enterprises across the state.

In 2017, the South Dakota Agritourism Work Group was formed to create an intensive program aimed at providing education, training and various support services to agribusiness owners interested in expanding their operations to include recreational, entertainment, educational, hospitality, cultural, on-farm sales and other activities for the general public. As tourism and agriculture are the two most significant business sectors in the state, organizers felt it only made sense to combine the two.

Spearheaded by South Dakota State University Extension and the state Office of Tourism, other local, state and federal agencies and entities joined in the effort. A partial list of participating organizations includes the Bed and Breakfast Innkeepers of South

Dakota, Experience Sioux Falls, Southeast Technical Institute, the South Dakota Specialty Producers Association, the South Dakota Value Added Ag Development Center and others.

According to Program Coordinator Stacy Hadrick of SDSU, AgritourismSD kicks off this month and consists of eight two-day, in-person workshops taking place over the course of 24 months where instructors provide the basic skills and tools that have been demonstrated to help increase the chances of success. The curriculum includes field visits to venues that already have a sustained track record of running thriving agritourism businesses.

The Circle View Guest Ranch, a member of West River Electric Association, is one of those venues. During the program's second year, the facility is slated to serve as a case study on how to launch and grow an agritourism operation and participants can have direct personal conversations with operators who will offer solid advice on every aspect of their business. Kruse said she looks forward to sharing some of the approaches and strategies that she and Philip have used to keep visitors coming to the ranch. The program, which kicks off this month, is designed to educate and train those associated with the ag industry on how to start, manage and operate an agritourism enterprise.

"This is such an excellent time to do something like this because things are opening up and people are ready to travel and escape the cities, get off the interstate and explore the back roads and see the tremendous beauty of our state," Kruse said. "They're craving an authentic experience after being shut down for so long."

Kruse added that she is eager to coach and encourage the group, but she also plans to shoot straight. That means giving the partici-

pants a healthy dose of unvarnished reality so they'll have a clear understanding of the commitment required.

"I think it's a wonderful program for our state. We're going to show them how we make things work with the overnight facilities and with the animals and their interactions with our guests," she said. "The business pretty much runs our lives for seven to eight months out of the year, and if you do it right it's all-consuming. But it's also extremely rewarding to see families have a terrific time bonding with each other, bonding with the natural landscape and the animals. It can be extremely rewarding for our guests and for our family as we're always making new friends. But you have to be committed."

Amy and her husband operate 12 guest rooms and three cabins with an average of 30 guests at any given time from April through September. She explained the cattle ranch and the bed-and-breakfast are separate businesses all set on 2,800 acres of land that includes prairie terrain in addition to Badlands formations, a river valley, rock beds, rolling hills, grazing pastures and tree groves.

For more effective statewide coordination, the AgritourismSD program organizers have developed a hub system, selecting the communities of Wall, Faulkton and Timber Lake to serve as regional organization centers. Participating business owners work through these hubs and meet six times over two years to share ideas and

discuss strategies for attracting visitors to their communities.

Robin Bickel is the hub coach for the Timber Lake area. A member of Moreau-Grand Electric Cooperative, Bickel runs a Red Angus cattle ranch in Firesteel that has been in the family for four generations. She said her interest in getting involved was to pursue potential economic growth not only for her ranch but for the entire area as well. She also sees agritourism as an incentive to both keep and attract young families to rural communities.

"If working ranches can find ways to expand and diversify their businesses, it may present opportunities for those young people who have left to come back to the family farm and be able to generate enough revenue to sustain multiple families on one place," she said.

Aside from the potential for added revenue, Bickel said she is eager to share with the rest of the world the wonders of rural life and the rural lifestyle she experiences each day.

"I think there's an increased interest people have about where their food and fiber come from, and we need to find a way to make that connection between the producer and consumer," she said. "We have such a rich history and so many natural resources to share. It's insane how many people can't see the sky full of stars at night where they live and can't see the prairie grass waving in the wind and

rolling across a hillside. There are people interested in things we take for granted. There are people in Nebraska that have a prairie chicken dance tour where people actually pay to see the chickens. I think there are many opportunities for our state if we commit ourselves and do it right."

For more information on the program, contact Jacey Ellsworth, Industry Outreach and Development Representative, at 605-773-3301 or Jacey.Ellsworth@TravelSouthDakota.com.

Continued From Page 3

West Central Electric Awards Scholarships to Area Youth

Tyanne Geppert

Tyanne Geppert – I am from Fort Pierre, S.D., and live on my parents' ranch, raising Simmental and Angus cattle. In my free time, I enjoy helping out on the ranch, showing cattle and anything that involves being outdoors. I attend T.F Riggs High School in Pierre and have been involved in National Honors Society, FFA, FBLA, student athletic training and 4-H. I plan to attend South

Dakota State University to become a physical therapist. I am excited to see what this fall has in store for me and can't wait to become a jackrabbit!

Jackson Grimes – My name is Jackson Grimes and I am from Kadoka, S.D. I play three sports – football, basketball and rodeo. My dad trains performance horses and my mom is the head of the physical therapy department at Martin's hospital. I also have three younger siblings – two brothers and one sister. I plan to attend South Dakota School of Mines in the fall and pursue a degree in civil engineering.

Jackson Grimes

Garret Hatheway

Garret Hatheway – Hello, I am Garret Hatheway and I received the West Central Scholarship. I plan to attend Mitchell Technical College to become a HVAC Technician with hopes of coming back to my hometown and starting my own businesses. This scholarship will help pay for books and tools to further my education. Thank you so much for selecting me.

Jasmine Hiatt – My name is Jasmine Hiatt, daughter of Mike and Katie Schultz in Philip, S.D. I have lived in South Dakota my entire life, and I love all of the opportunities that small communities have to offer, such as being the recipient of this scholarship. I will attend Western Dakota Technical Institute this fall to pursue an EMT/paramedic degree. I love helping my community, and through my education, I can help even more.

Jasmine Hiatt

Mason Iversen – My name is Mason Iversen. I am 17 and live in

Mason Iversen

Murdo S.D., along with my parents Troy and Jody Iversen and my brother Conner. I spend most of my day helping on the farm or with cattle, and I spend most of my free time in the outdoors, hunting and fishing.

Noah Johnson

– I'm Noah Johnson, son of Jon and Connie

Johnson from north of Midland, S.D. My brothers are Wyatt Johnson, who is an ag teacher in Fort Pierre, S.D., and Avery Johnson, who is an engineer at Scotchman Industries in Philip, S.D. I went to rural school through eighth grade and then attended Philip High School. I appreciate this scholarship and will attend Mitchell Technical College for progressive welding technology in the fall.

Noah Johnson

Alyssa Jones

Alyssa Jones – I grew up in Lower Brule and live with my parents and younger sister, Nyannah. In high school, I participated in various sports, band and the National Honor Society. Next fall, I plan to continue some of these activities while furthering my education. In my free time, I enjoy giving back to my community, running and spending time with family. I am extremely grateful to be a recipient of this scholarship and extend my gratitude

to West Central Electric!

Caleigh Little – My name is Caleigh Little, and I am from Cherokee Nation living on the Lower Brule Sioux Reservation. I am a senior student at Lower Brule High School who will be attending the University of Sioux Falls in the fall. I plan to get my bachelor's degree in exercise science and become a physical therapist. My ultimate goal is to work for Sanford Health as a physical therapist to help athletes, like myself, who have been injured and to also rehabilitate and treat chronic conditions or serious injuries.

Caleigh Little

Drew Lulf – My name is Drew Lulf, and I will be graduating from Lyman High School this spring. I have lived in Reliance my entire

Drew Lulf

life surrounded by family and friends. In high school, I have been able to enjoy many activities such as volleyball and student council. I plan to attend SDSU and work towards becoming an occupational therapist. I want to eventually move back home so that I can be close to family.

Allison McManus – My name is Allison

McManus and I live in Reliance, S.D. I am a senior at Lyman High School, and next year, I plan to attend Black Hills State University to pursue a degree in exercise science. Then, I intend to go to a different university for a doctorate in physical therapy. Currently, I'm involved in volleyball, track, student council, FFA, band and choir. I'm very thankful to be selected for this scholarship!

Allison McManus

Wyatt Olson

Wyatt Olson – My name is Wyatt Olson and I am a member of the class of 2021 from Jones County High School. This fall, I plan to attend South Dakota School of Mines and Technology to major in pre-professional health science. After obtaining this degree, I intend to further my education by specializing in either physical therapy or pharmacology. I am very honored and grateful to be selected

as a West Central Electric Scholarship recipient. Thank you!

John Piroutek – I am John Piroutek from Milesville, S.D. My parents are Mike and Faye Piroutek. I attended Milesville Rural School until I completed the 8th grade and have attended Philip High School for four years. This fall, I will be attending South Dakota State University to pursue an ag business degree. With this scholarship, I am excited to see what the future holds.

John Piroutek

Brianna Smith

Brianna Smith – Brianna Smith, also known as Bri, lives in Vivian, S.D., and is the oldest daughter to Matt and Julie Smith. She has played an active role on the family ranch which has inspired her to pursue a veterinary career. She will be attending Chadron State College in the fall to obtain an undergraduate degree in health sciences veterinary medicine.

Arly Spry – My name is Arly Spry, and I am the daughter of Joel and Jari Spry. I am currently a senior at Philip High School and plan to pursue pre-pharmacy at South Dakota State University in the fall. One big career goal of mine is to own a pharmacy in a rural town in South Dakota, much like the one in Philip so I can maintain good connections with people and support a small community.

Arly Spry

Gaven Sudbeck

Gaven Sudbeck – Hello, my name is Gaven Sudbeck and I was born and raised in South Dakota. I grew up to be a very wholesome and competitive kid, so I was extremely excited to hear that I have been picked to receive this scholarship. I have four other siblings that have graduated and three of them received this scholarship as well. I am joyful to be able to use this money to pursue a degree in engineering.

Dilyn Terkildsen – I'm Dilyn Terkildsen, and I am a senior at Philip High School. Next year, I plan to attend South Dakota State University and major in early childhood education in hopes to one day be a lower elementary teacher.

Dilyn Terkildsen

Rural POWER

Leadership Program Aimed at Boosting Co-op Leadership

Intentional listening is a skill Billie Sutton has honed over the course of his adult life. And as he leaned into recent conversations with electric cooperative leaders across the state, the former legislator from Burke started noticing a trend.

He picked up on a common refrain: cooperatives are having a hard time finding qualified candidates to run for positions on their governing boards.

As not-for-profit organizations, electric cooperatives don't have pockets deep enough to dangle large compensation packages in front of potential board candidates. This reality tends to narrow the field of interested parties.

After hearing this a few too many times, Sutton decided to take action and do something about it. He began working to develop a leadership program through his non-profit Billie Sutton Leadership Institute to encourage and inspire rural co-op members to consider campaigning for a board position.

The new year-long leadership development program is called "Rural POWER: Powering Opportunities While Energizing Rural." It will be held alongside the third leadership class offered by the Institute. The first program in 2019 attracted more than 100 applicants to fill 12 spots. Last year's class drew roughly 70 applicants but was hampered by the impact of the pandemic.

Sutton surmised that the high interest level in the Institute's first two programs stems from a desire to return to a more community-focused style of leadership and steer away from a brand of politics that appears to be growing more openly hostile.

His supposition comes from the comments he heard not only during his six years serving in the state senate but also from voters during his gubernatorial campaign three years ago in which he received more than 167,000 votes while losing the race to Gov. Kristi Noem.

Billie Sutton and his wife, Kelsea (foreground) are shown with the Institute's inaugural class of rural leaders.

"I think people were excited about a new style of leadership I brought to the table that's focused on service, finding common ground, overcoming adversity and getting things done on behalf of the people. I think people are tired of politics as usual," he said.

For the Institute's inaugural class, applicants ranged in age from 18 to 60 and represented a plethora of professional backgrounds: health care, teaching, education administration, local elected officials, ranchers and more. Sutton said he hopes the new program will also attract interest from a diverse set of applicants.

Rural POWER will kick off this summer and is sponsored by the South Dakota Farmers Union. Participants will engage in educational leadership training opportunities emphasizing community building and

Participants will engage in educational leadership training opportunities emphasizing community building and serving neighbors, while learning from cooperative leaders.

serving neighbors, while learning from cooperative leaders who have demonstrated their commitment to rural development. They will gain the knowledge and enthusiasm to re-imagine and re-energize rural South Dakota, Sutton said.

Rural POWER aims to provide leadership training that will help re-invent and re-energize rural South Dakota.

The program has an advocate in Melissa Maher, general manager at Moreau-Grand Electric based in Timber Lake. Maher notes that while most of the state's electric co-ops qualify as "rural," that doesn't mean they are merely small-time mom-and-pop operations. For instance, Moreau-Grand Electric is a member-owned business with more than \$47 million in assets.

Maher said it's important that electric co-ops be run by managers and board members dedicated to the task at hand. Board directors are democratically elected by the members in their respective districts and charged with the responsibility of developing the policies that guide the future of the co-op. They also have certain legal, fiduciary and industry-related issues they must deal with during the course of carrying out their duties.

"These are positions of responsibility and leadership, and you need qualified people because they're making big decisions," Maher said, adding that serving on a co-op board requires considerable time and attention. "If someone is interested in being nominated, you have to be up front and honest about that fact. That's one of the first things people ask, and the honest answer is that it's a commitment."

Those who succeed in meeting their board responsibilities recognize and appreciate the fact they're contributing to the advancement of their entire service area by providing an essential commodity. Maher said it also takes a certain type of personality and temperament to be a successful board member.

"They have to learn protocol and there can be situations like dealing with personnel issues where they have to be discreet. They have to be the type of person who can agree to disagree and walk away and not let it get to them," Maher said. "They have to study up on the issues. We send out information a week ahead of time so that the board members can brush up on things and we can have a productive conversation. They need to care enough to be engaged and prepared."

Suzie Jones Pranger serves as executive director of the Institute. Today, Jones Pranger is an attorney living in rural Hartford, but she grew up on her family's farm in Burke and remembers her grandfather's involvement in her local co-op, Rosebud Electric.

"Even as a kid, I knew our power came from the local co-op, and I knew my family had a legacy of service to the co-op and our neighbors through my Grandpa's longtime position on the board," she said. "But what I never considered growing up is the need for subsequent generations to become active and continue to power our rural communities and our South Dakota way of life. Rural POWER will help build a pipeline of rural leaders ready to step up and take on leadership positions."

Kevin Mikkelsen, general manager of Rosebud Electric, is also supportive of the program and believes there is a lot of potential in the leadership program, especially when it comes to drawing some younger participants.

"I'm hoping the program sheds some light

on how cooperatives function and how they work on behalf of all the member-owners," he said. "All around the state, we really need to see some younger folks get involved and provide a new perspective and help us discover new and more effective ways to carry out our mission as co-ops, whether it's electric co-ops or ag-based co-ops."

South Dakota Families Struggle to Stay Connected in Post-Pandemic Times

Billy Gibson

billy.gibson@sdrea.coop

Some people can pinpoint the positive in just about any predicament...even a global pandemic. Lynell Rice Brinkworth considers herself the sort of person who places a premium on optimism.

While social scientists continue to crunch the numbers, analyze the data and draw conclusions about the pandemic's impact on families across the country, Brinkworth has witnessed the struggles families have faced but also sees signs of hope.

Brinkworth is a licensed family therapist practicing in the Rapid City area and also serves as president of the state's Board of Examiners for Counselor and Marriage and Family Therapists. Though she acknowledges there was a lot of negative consequences caused by the coronavirus that swept across the globe last year, Brinkworth is quick to emphasize many South Dakota families emerged stronger, more resilient and more committed than before.

Amid the chaos that ensued when it became clear the coronavirus would be more than a two-week span of minor inconvenience, experts began reporting a higher incidence of family dysfunction brought on by the stress of job loss, financial difficulties, online learning, disruption of daily routines, restricted travel, isolation from extended family members and other pressures.

Across the continents, there were reports of increases in child abuse, spousal abuse and domestic violence as families were forced to lock down for the long term and curtail their in-person social interactions. Consequently, experts predicted an enormous upturn in the divorce rate, which would seem to be an inevitable outcome of such a difficult predicament.

While there are some limited studies that indicate the number of couples seeking divorce did actually increase, a study of

Family therapist Lynell Rice Brinkworth says many South Dakota families are working through their challenges and keeping their family units intact.

five states by Bowling Green State University showed divorces actually decreased by 35 percent through the first half of 2020 compared to the previous year. That study also indicated that the marriage rate in those states continued to drop by about 30 percent, which researchers noted continued a pre-pandemic trend among Millennials who have taken a more cautious approach to the institution of matrimony and also reflected the fact that lockdowns limited the number of wedding ceremonies taking place.

For her part, Brinkworth reports that during the pandemic she saw more couples succeed in saving their marriages than failing to hold their relationships together.

"By the time couples come to me there's usually something boiling under the surface, not just over the past three months but maybe for the past three years," she said. "During the stress of the pandemic we saw all of that coming up to the surface and a lot of people reached their boiling point. But the majority of

the couples I've seen were able to work through their problems."

Similar to medical workers who have been overwhelmed addressing the physical needs of COVID-19 patients for more than a year, Brinkworth and her colleagues have been busy helping to restore relationships and working with individuals to sort through issues related to anxiety, grief, financial struggles and more.

But in keeping with her sunny demeanor, Brinkworth brings out the bright spots. She explains that being confined in close quarters with other family members presented an opportunity for individuals to put down their electronic devices and interact on a more intimate level with loved ones. She said families were able to slow the frenetic pace of their daily lives and "step back from the rat race."

"I heard parents say that they haven't had a family dinner together in years because of their busy lives with work and school and sports and other activities that happen every day," she said. "Others had the

opportunity to get out and do things they don't normally do, such as get outdoors and exercise. I drive past a trail head on my way in to the office and I saw more people there than I ever had before."

In working with her patients to achieve favorable outcomes, Brinkworth said she didn't want to minimize or ignore the real difficulties families have experienced over the past 12 to 14 months. The stress, she said, resulted in a variety of problems for people such as less quality sleep, changes in dietary habits, drug and alcohol consumption, grief from the loss of loved ones, depression, internal family conflict and other challenges.

Brinkworth declined to express an opinion as to whether the state should have locked down in response to the coronavirus, but she believes the citizens of South Dakota will benefit from a gradual return

to normalcy. One particular group that should see a tremendous benefit, she said, is students. Even as nearly 2,000 South Dakotans lost their lives to the disease, many teenagers not only had to deal with the loss of a loved one but also had to miss traditional rites of passage such as graduation ceremonies, religious ceremonies, birthday parties, weddings, family vacations and other milestone events.

"It has been really hard on children and students. For a lot of kids, not being able to go to school was hard on both the parents and students. For many of them, school is their safety zone where teachers and instructors can keep their eyes on them," she said.

"There's been a big concern over children. Some kids have done well with the on-line learning and the isolation but most that I've talked to said it just wasn't their thing.

They couldn't wait to get back to school and get back into their social circles and be with their classmates. When the sports seasons were canceled, that was a big thing for kids who get a lot of satisfaction and have a lot of their self-esteem, confidence and identity tied into their participation in sports."

The impact of COVID-19 on family relationships will take a while to fully resolve, but Brinkworth is hopeful that the pandemic has brought some clarity in our interactions with, and appreciation for, our family members and friends.

"We get swept up in technology and social media and the internet," she said. "But I really think the trauma we've all experienced through this event will cause us to think about putting down our devices and spending more time really getting to know one another better."

Sensible Solutions for Our Energy Future

South Dakota's electric cooperatives support reasonable strategies for our energy future that make sense for our members:

- Renewable energy solutions that are both productive and practical
- Rate structures that take affordability into account
- Balanced strategies centered on the best interests of co-op consumers
- Technology-based policies that promote economic development

DOE Announces \$24.5 M Investment in Grid

America's economy, national security and even the health and safety of our citizens depend on the reliable delivery of electricity. The U.S. power grid is an engineering marvel with 9,200 generating units and more than 1 million megawatts of generating capacity connected to 600,000 miles of transmission lines.

The grid is an ecosystem of asset owners, manufacturers, service providers, and officials at federal, state and local levels, all working together to run one of the most reliable systems in the world.

The U.S. Department of Energy recently announced \$24.5 million for manufacturing innovation to build a clean and resilient grid. The Office of Electricity (OE) is currently working to strengthen, transform, and improve energy infrastructure to ensure access to reliable, secure, and clean sources of energy.

The country's grid is aging and is being pushed to do more than it was originally designed to do. Modernizing the grid to make it "smarter" and stronger through the use of cutting-edge technologies, equipment, and controls that communicate and work together to deliver electricity more reliably and efficiently can reduce the frequency and duration of power outages, reduce storm impacts, and restore service faster when outages occur.

Consumers can better manage their own energy consumption and costs because they have easier access to their own data. Utilities also benefit from a modernized grid, including improved security, reduced peak loads, increased integration of renewables and lower operational costs.

Note: Please make sure to call ahead to verify the event is still being held.
