**Basin Electric
Members Bus Tour**
August 26-28

Ever wonder where your electricity comes from?
Take the Basin Electric Tour and see it firsthand!

Sign up today to reserve your seat! West Central Electric is again offering our member-owners a Basin Electric Bus Tour. The tour will be held on August 26-28, and members will have the opportunity to see the electrical system that provides electric power to their homes and farms. You'll see Basin Electric Co-op Headquarters, Antelope Valley Station electric generating plant, Coteau Properties Freedom Mine, Great Plains Synfuels Plant, and Transmission System Maintenance Menoken outpost. This is an excellent opportunity for members to view their vast electrical system "up close." You'll make new friends and see some fascinating sites. Best of all, the trip is free! If you are interested in such a trip, please fill out the form below and send it to our main office at West Central Electric PO Box 17 Murdo, SD 57559. For additional questions, please call us at 605-669-8100!

Design assistance by SDREA

West Central Electric Operations

Jeff Birkeland
CEO

A warm January thaw is always welcome, and as I sit down to write this month's article, the high for today is well above freezing. I suppose you may call it spring fever, but we are very much looking forward to warmer weather and the start of our construction season.

Speaking of construction season, be sure to look for the article from our operations manager in this issue. The article has details about the construction projects we will be working on this year and informs you where our linemen and equipment will be located.

We closed our books for 2024, and we had a good year. West Central ended the year with margins of \$413,000, and our power supplier gave us a capital credit allocation of \$517,000. These two amounts total \$930,000 and will be allocated to our membership in June. Here's an interesting fun fact: West Central has paid its members 18.5 million dollars in capital credit retirements since incorporation.

As I was looking through the year-end financials, I came across some interesting information. I suspect everyone knows or has heard about One Call. One Call is a requirement that you call 811 before you dig. It is designed to keep people safe from digging into underground utilities such as electrical lines. It is a service provided free of charge to the public, and by calling 811, you avoid potential liability and personal harm. If there are underground utilities located where you want to dig, the utility will come onsite and mark their lines so you can avoid digging into them. A person must call 48 hours in advance. And when I say in advance, that is 48 hours of work week hours, weekends and holidays do not count towards the 48 hours. The cost of this service is borne by the utilities who own the buried lines. This is where the interesting information comes into play. In 2024, West Central responded to 1,501 locate calls and spent over 900 manhours locating our underground electrical lines. We also logged over 12,000 miles to make the locates. So basically, it took one full-time employee half a year to complete the One Call service we are required to perform.

Since the start of 2025, we have also received good news from the government. Some of our environmental regulations have been relaxed, making our jobs easier and more efficient. Prior to receiving this news, if we wanted to replace one mile of overhead line with a mile of underground, we were looking at 220 pages of environmental paperwork. Pretty crazy, in my opinion. Today, the 220 pages of environmental paperwork still apply, but they have reduced the instances where it applies. It just happens that this change will definitely help us be more efficient in getting our construction projects and paperwork completed.

The current administration has also stepped in and put our grants on hold. West Central was awarded two grants totaling 2.8 million dollars to bury 19 miles of 3-phase underground. This grant will pay for 70% of the cost, which would be a great benefit to our membership. We are in a holding pattern until the administration decides whether to allow the grant to remain intact.

The last thing I'll report on this month is that the 2025 annual meeting will be held at the Expo Center in Fort Pierre. The date is 10-1-2025 and we look forward to seeing everyone there!

Falls Are Preventable

March is Ladder Safety Month. Whether working from a ladder, roof or scaffolding, it's important to plan ahead, assess the risk and use the right equipment. First, determine if working from a height is absolutely necessary or if there is another way to do the task safely.

- Discuss the task with coworkers and determine what safety equipment is needed.
- Make sure you are properly trained on how to use the equipment.
- Scan the work area for potential hazards before starting the job.
- Make sure you have level ground to set up the equipment.
- If working outside, check the weather forecast; never work in inclement weather.
- Use the correct tool for the job, and use it as intended.
- Ensure stepladders have a locking device to hold the front and back open.
- Always keep two hands and one foot, or two feet and one hand on the ladder.
- Place the ladder on a solid surface and never lean it against an unstable surface.
- A straight or extension ladder should be one foot away from the surface it rests on for every four feet of height and extend at least three feet over the top edge.
- Securely fasten straight and extension ladders to an upper support.
- Wear slip-resistant shoes and don't stand higher than the third rung from the top.
- Don't lean or reach while on a ladder, and have someone support the bottom.
- Never use old or damaged equipment; check thoroughly before use.

Fall Hazards at Home

Are you a weekend warrior or do-it-yourselfer? If you take on home improvement or other weekend projects, it's important to prepare yourself for physical exertion, especially if you've been sedentary through the winter months, and take extra precautions to prevent falls.

Risky projects, like installing siding, gutters or roofs, are best left to professionals. Saving money isn't worth risking a debilitating or fatal fall.

At home or at work, many of the same rules apply. When taking on a project, remember the following.

- Practice all of the ladder safety tips mentioned to the left.
- Keep the work area clear of hazards and immediately clean up spills.
- Read all instructions and safety precautions on your equipment.
- Don't wear loose clothing that can get caught in equipment.

"Don't cut trees near power lines."

Remington Welsh, Age 11

Remington warns readers to not cut trees around power lines. Thank you for your picture, Remington! Remington's parents are Ryan and Rachel Welsh, members of Black Hills Electric Cooperative.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Hearty FAMILY MEALS

EASY CREAMY HAMBURGER PASTA

Ingredients:

1 lb. ground hamburger
1 lb. cooked pasta
5 oz. spinach
1/4 cup butter
2 cups heavy cream
1 tbsp. minced garlic
1 cup grated parmesan cheese

Method

In a large pan, brown hamburger and minced garlic. Remove any excess grease. Turn heat to low and add the butter and heavy cream. Stir and simmer for a few minutes until the butter melts and it starts to boil. Stir in the spinach and cook for about three more minutes. Stir in the parmesan and cooked pasta. Enjoy!

Lyndell Todd
Rapid City, S.D.

MINI BBQ BACON CHEDDAR MEATLOAF

Ingredients:

2 lbs. ground beef
6 oz. chili sauce
4 slices bacon, cooked and crumbled
1 1/2 cups shredded sharp cheddar cheese
1/2 cup panko breadcrumbs
2 large eggs
1 tsp. onion powder
1 tsp. seasoned salt
1 tsp. garlic powder
2 tbsps. Worcestershire sauce
1 tsp. yellow mustard
1/2 cup BBQ sauce

Method

Preheat oven to 425°F. Cook and crumble bacon. In a mixing bowl, mix together all meatloaf ingredients except the BBQ sauce. Divide the mixture into eight round loaves. Press a small depression into the middle of the meatloaves. Brush BBQ sauce on top of the meatloaves. Bake for 25 minutes. Turn on broiler and brown the BBQ sauce for two to five minutes.

Kayla Beaner
Centerville, S.D.

SKILLET CHICKEN POT PIE

Ingredients:

1/4 cup butter
1 cup chopped onion
1/4 cup flour
2 cups chicken stock
1 cup milk
1/2 cup apple cider
1/2 tsp. garlic powder
1/2 tsp. ground cinnamon
1/2 tsp. whole thyme leaves
1/4 tsp. black pepper
2 cups cubed cooked chicken
1 large sweet potato, peeled and cut into 1/2-inch cubes (about 2 cups)
1 cup frozen peas
1 can (7.5 oz.) refrigerated biscuits, (10 biscuits)

Method

Preheat oven to 450°F. Melt butter in large ovenproof nonstick skillet on medium-high heat. Add onion; cook and stir five minutes or until softened. Sprinkle with flour. Stir with whisk until mixture is well blended. Add stock, milk, apple cider, garlic powder, cinnamon, thyme and pepper; whisk until mixture is smooth.

Stir in chicken, sweet potatoes and peas. Bring to boil. Reduce heat to medium; cook and stir 15 minutes or until sweet potatoes are tender.

Place biscuits on top of chicken mixture. Bake 10 minutes or until biscuits are golden brown.

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2025. All entries must include your name, mailing address, phone number and cooperative name.

Landscaping to Save Energy

Miranda Boutelle
Efficiency Services
Group

Q: How can landscaping help lower my energy bill?

A: There's a lot going on in the space around our homes. Competing factors of aesthetics, safety, energy efficiency, water conservation and increasing risk of wildfires are a lot to consider. Thoughtful planning and good design can address these factors and result in year-round energy savings.

Carefully positioned trees can save up to 25% of a typical household's energy use, according to the United States Department of Energy (DOE). When selecting the right trees and other foliage, research what is best for your local climate. Select native species naturally adapted to your location for lower maintenance.

Strategically placed deciduous trees allow for summer shade and passive solar heat gain in the winter when leaves have fallen. This can lead to energy savings in the summer and winter.

Slower-growing trees might take longer to provide maximum shading benefit, but their roots are typically deeper, and branches are stronger. These factors can make them less likely to be damaged by wind, snow or ice, and be more drought resistant.

Be sure to plant large trees far enough away from your home to prevent damage from falling branches or root damage to your home's foundation.

Keep in mind, if you have a rooftop photovoltaic solar system, even a small amount of shade can significantly reduce energy production. Consider smaller plantings closer to the home to shade walls, windows or hardscaped surfaces, such as driveways and sidewalks.

Windbreaks are another landscaping strategy that can be beneficial for energy savings in windy areas. The DOE says windbreaks reduce wind speed by as much as 30 times the windbreak's height. That, in turn, reduces wind chill near your home and can lower heating costs. The DOE recommends planting two to five times the mature tree's height away from your home.

Plant evergreen trees and shrubs for windbreaks and consider adding fences or earthen mounds to help lift

the wind up and over your home. In cold climates, they offer the added benefit of acting as a snowdrift to keep snow from piling up against your home.

Keep landscaping clear of dryer vents, heat pumps and air-conditioning units to ensure access for maintenance and airflow around those locations.

If you live in an area at risk of wildfire, create a defensible space around your home. Consider hardscaping with gravel, bricks, pavers or stone shaded by fire-resistant awnings or covers. Plant fire-resistant plants with proper spacing of plants and trees from your home and other structures on your property.

When landscaping, always consider safety first. Call before you dig to ensure you know where any underground power, gas, water or sewer lines are located. The national 811 Underground Service Alert program routes you directly to your local resources. Call 811 or go to call811.com before you dig.

Be mindful of overhead power lines, too. Look up and check the surroundings before setting up ladders. Be thoughtful when planting new landscaping that could encroach on power lines. Utility equipment should have at least 10 feet of clearance, when possible.

As you prepare to refresh your yard for the coming spring and summer, consider ways you can boost your energy efficiency for more comfort and savings year-round.

Crafting Memories

Jaylie's Custom Pens Turns Parts Into Art

Frank Turner
frank.turner@sdrea.coop

Jaylie Beckman, a member of Grand Electric near Bison, S.D., has a knack for taking something as ordinary as a pen and making it extraordinary.

Last year, Jaylie and her mother, Jenny, ordered a custom nursing-themed pen advertised on Facebook as a gift for her sister-in-law, a nurse at West River Health Services in Hettinger, N.D. When the surgery department manager saw the pen, she wanted 10 more for their entire team.

“At first, we said, ‘Wait, we bought them from somebody else.’ But then we thought, if they make can make them, we can too,” Jenny said. “It all exploded from there.”

Encouraged by the growing interest in her community, Jaylie embraced the challenge. Inspired, she began exploring TikTok and other social media for new ways of making pens and ordering supplies for her new endeavor: Jaylie’s Custom Pens. Combining beads with pens, Jaylie began transforming basic parts into something that is truly one of a kind.

In May 2024, Jaylie and Jenny opened their first vendor booth at the Bison Spring Vendor Fair, showcasing nursing, faith-based and graduation themed pens.

Since then, the two have traveled across northwest South Dakota and southwest North Dakota, displaying Jaylie’s beautifully

Jaylie Beckman selling pens at a vendor show in Timber Lake.
Submitted Photo

crafted pens at trade shows in Faith, Hettinger, Buffalo and beyond. Their booth now hosts a wide variety of customized pens with themes ranging from monster trucks and rubber ducks to butterflies – and Jaylie’s personal favorite, a pen topped with a focal bead that proudly states, “Cat Mom.” In total, Jenny estimates that Jaylie has sold more than 500 pens from their last eight craft shows.

“I really love it,” Jaylie said.

Beyond the fun aesthetic, Jaylie’s pens have also provided both her and her family a way to process a profound loss within their family. In January 2024, Jenny lost her granddaughter, Jaylie’s niece, to a farm accident. In her memory, Jaylie and Jenny created purple pens with Minnie Mouse beads to help raise money in a silent auction for a commemorative park.

“Creating these pens gave Jaylie something to focus on and put her energy toward during that difficult time,” said Jenny. “I think it kept her mind off of it and I know it helped me.”

Jaylie continues to take custom requests for pens. She has also expanded her inventory to include bracelets, Crocs charms, stickers and keychains. Those interested can find her work on the Jaylie’s Custom Pens Facebook page, where she shares updates on her latest projects.

Jaylie Beckman’s favorite custom pens proudly state, “Cat Mom.”

West Central Electric CEO Jeff Birkeland, left, is the retired archery coach, and IT Coordinator Derek Wolf, right, is a first-year rifle coach for Jones County, South Dakota.

SOUTH DAKOTA 4-H SHOOTING

Shooters Prepare for the State Competition in April

Jocelyn Johnson
jocelyn.johnson@sdrea.coop

Dedicated practice is the price each marksman pays to qualify and compete at the South Dakota 4-H Shooting Sports state event.

Sophie Wolf takes aim during a weekly practice.

This year, hundreds of shooters will compete on April 25-27 to showcase marksmanship. Their hard work will be on display as every shot will impact the final score. Among these competitors is a dedicated group from Jones County, South Dakota. For the past two decades, employees from West Central Electric Cooperative in Murdo, S.D., have dedicated their time to coaching various 4-H shooting disciplines.

“It’s the cooperative giving back to the community and promoting our youth,” said Jeff Birkeland, CEO of West Central Electric. “A few years ago, we took 41 kids to state, and we brought home 43 state trophies. I’m proud of our kids.”

Birkeland coached archery for 15 years and happily recounted the experience with his two boys during that time.

“Kids want to shoot. We have the best participation in shooting sports

than we have in anything else.”

Birkeland’s son, Jacob, competed for 10 years in shooting sports among other 4-H competitions.

“While I explored many aspects of 4-H, shooting sports became my primary focus,” Jacob said. “I began my journey in shooting sports with BB gun and was introduced to archery. Archery quickly became my main area of competition, and it has been an incredibly rewarding and impactful part of my 4-H experience.”

This experience offered him a competitive edge as well as bonding memories that Jacob vouches as life shaping.

“One of the greatest highlights of my time in 4-H has been the lasting friendships and memories I’ve built along the way,” Jacob said. “Whether it was constructing a trophy shelf with my grandpa, having archery competitions against my dad to see who had to do the chores or representing South Dakota at the national shooting sports event – each experience has contributed to my personal and professional growth. I would not be where I am today without it.”

Matthew Birkeland, left, stands with Hayzen Sealey, right, at the spring state competition.

Derek Wolf, IT coordinator for West Central Electric and first-year coach for Jones County 4-H, said, “We begin practicing once a week in January. We work on safety first – getting the kids comfortable with their firearms. Then, we step into practicing for competition.”

Each county competes in three matches leading up the state competition, and every participant must make a qualifying score in at least one match to qualify for state.

“We encourage every kid to enter and compete in all three matches,” Birkeland said. “It’s better to practice at it instead of getting to state and having the wheels fall off.”

The art of practicing perfectly is what brings these competitors to state. Birkeland noted that those who practice, will win. And those who overcome a disappointment may come home with the trophy.

“It teaches those kids a lot about life,” Birkeland said. “You practice and practice, you put the time in and then one thing happens – one flinch,

one mistake and it’s over. Emotionally, hopefully it strengthens them a bit. Instead of breaking down and crying, you better be able to handle it...Limit your problems. Don’t increase them with a mental meltdown.”

Wolf agreed with this sentiment and described how overcoming a bad shot and being mentally tough is sometimes more important than being a skilled shooter.

“There are a lot of kids who find success in this, so I find it rewarding to be involved as a coach,” he said.

Wolf’s daughter, Sophie, competes in .22 rifle and archery and remarked that the highlight of the competition was that it challenged her and made her a stronger competitor. She trains twice per week for several hours while preparing for the state competition.

“I feel excitement when I compete,” Sophie said. “I love the challenge.”

In 2024, more than 1,600 participants competed in various disciplines at the spring state shooting event. These disciplines

are pistol, archery, rifle, hunting and western heritage. An additional 270 participants competed in the fall state shooting event for shotgun and muzzleloading. Each year, the top five shooters win trophies and this year’s winners may be chosen to represent at the 4-H Shooting Sports National Championships in Grand Island, Neb., on June 22-27. Last year, South Dakota tied for 2nd place with Missouri at the national event.

John Keimig, South Dakota State University Extension Youth Safety Field Specialist, emphasized that the shooting program is made great by the people who volunteer.

“One of the great things about small communities in South Dakota is people who give their time to volunteer,” said Keimig. “If it wasn’t for people who volunteer, we wouldn’t have this successful program – whether it be volunteers who work full-time for an electric cooperative or farmers and ranchers. They are the backbone of this program.”

Archers stand on the line at South Dakota’s spring state competition.

2025 PROJECTS

Scott Kittelson
Manager of
Operations

Even though it is late January, temperatures are in the high 40s and low 50s, and today we are under a “Red Flag” warning. As I said the last two years, I am happy to say we are not presently doing any storm cleanup and are continuing with regular wintertime maintenance and construction activity. I hope the weather stays mild and we have a wet spring as I write this.

With the milder winter, the crews have been working on OCR change-outs, line retirements, line patrol, meter readings, tree trimming, line maintenance, pole change-outs, electric heat connects, service upgrades, pole testing, infrared testing, and a few new overhead services.

We are looking forward to another busy construction season this year. We will convert another 36 miles (detailed below) of the original overhead line built in the early 1950s to underground. Most of these lines were constructed with 30’ class 7 poles, long spans, and with #4 ACSR conductor.

1. Continue with 7.5 miles of three-phase overhead to underground with V-phase 18 miles northwest of Philip along Hilland Road (all the wire and cabinets are installed).
2. Replace 1.75 miles of single-phase overhead to

- underground 2.5 miles west of Philip.
3. Replace 3 miles of single-phase overhead line with underground 10 miles NE of Presho (all the wire is installed).
4. Replace 1.5 miles of three-phase overhead line with underground 1.5 miles north of Reliance.
5. Replace .75 miles of single-phase overhead to underground just north of Kennebec.
6. Replace 4 miles of single-phase overhead to underground north of Kirley Road, 23 miles NW of Hayes.
7. Replace 3 miles of single-phase overhead to underground 1 mile east of Belvidere.
8. Overhead to underground 15 miles west of Fort Pierre.
9. Replace 3 miles of single-phase overhead to underground 1 mile east of Vivian.
10. Replace 4 miles of single-phase overhead to underground 5 miles west of Presho.

Our big project this past year was rebuilding 10.5 miles of 69 kV transmission line between Midland and north of 1880 Town along Highway 63, which made a few of the projects listed above carry over. We were able to retire the old 69 kV transmission line before summer’s end.

This summer, we will start the construction of burying all our overhead crossings from Fort Pierre west on Highway 34 to the Cheyenne Bridge by Bridger and north on Highway 63 from 4-Corners to the Cheyenne Bridge. This will be done over the next four years and will help considerably with high-load moves that travel east and west over the Oahe Dam north of Pierre.

As a carry-over project from last year, we will make system

improvements in the Reliance area, including sectionalizing changes and conversions of three-phase to single-phase. This will reduce line exposure to that area, reducing momentary blinks and outage times.

Since 2013, we have been doing our “In-House” pole testing. Previously, we used Osmose Utility Services Inc. out of Georgia for our annual pole testing. As reported from our inspection process regarding our aging plant and weather-related pole damage, we have over 100 pole replacements scheduled this spring and summer, mainly in the Philip and Kadoka areas. These poles are classified as non-priority poles and can be changed out later. We schedule priority poles (danger poles) immediately for replacement.

This year, we have an SDDOT road project for Highway 248 between Draper and Vivian. Before they can start the road work, we will have to move the line out temporarily for five culvert and bridge replacements; we will move them back after completion.

We have two substations to finish upgrades:

- Cheyenne Substation (Kirley Area)
- Murdo Rural Substation

With our busy work schedule planned and material available for this summer, please try to contact WCE well in advance for any new service requests or work you may want WCE to do. Please remember to call SD One-Call 48 hours before digging, 1-800-781-7474 or dial 811.

Wild Horses Roam at Black Hills Sanctuary

Jacob Boyko

jacob.boyko@sdrea.coop

In the southern Black Hills, a watchful eye will catch a rare and breathtaking sight: a herd of wild mustangs galloping freely across thousands of acres of grassland in the Cheyenne River Valley.

For the Black Hills Wild Horse Sanctuary staff and the hundreds of rescued horses they care for, it's just another day on the ranch.

The sanctuary operates like most working ranches, says Susan Watt, the president and CEO of the Institute of Range and the American Mustang. Staff regularly travel over 15 miles across the 10,000 acre ranch to fill water troughs and set out hay, mineral blocks and horse cake. It's a trek that takes them across picturesque grasslands, hills, bluffs and the muddy banks of the Cheyenne River. A bulwark against suburban sprawl, the land remains as nature intended.

"Wild horses have been part of North America since time immemorial," Watt explained. "We have a large population of American mustangs, Spanish mustangs, horses with blood lines that trace back to Spain and Portugal, and a small herd of Choctaw Indian ponies that were part of the Trail of Tears

– They are a very important part of American history we need to preserve."

The story of the sanctuary begins in the late 1930s with a young man named Dayton Hyde. At 13 years old, Hyde left his home in Michigan for his uncle's cattle ranch in Oregon after hearing captivating tales of the wild west's excitement and beauty.

Once he arrived, Hyde was completely enthralled by the western lifestyle. With each passing year, his connection to the land and the wildlife strengthened, shaping his identity as a cowboy, conservationist and writer.

Decades later in 1987, while on a trip to Nevada to purchase cattle, Hyde came across corrals of wild horses the federal government had rounded up using low-flying helicopters. Devastated by the idea of the free-roaming herds confined to pens, Hyde was inspired to create a refuge for wild horses where they could run free.

Hyde petitioned congress to allow him to take some of the captured horses and create a sanctuary. South Dakota Governor George Mickelson, who had learned of Hyde's ambitions and was supportive, invited Hyde to inspect a piece of land known as Chilson Canyon near Hot Springs, S.D.

For nearly 40 years now, that piece of land plus Hyde's hard work has given hundreds of wild horses another chance to roam wild. However, it's a luxury very few wild horses receive.

Since 2020, the Bureau of Land Management has reported

rounding up over 40,000 wild horses to control herd populations, which can grow rapidly in the wild. Their fates vary; At government holding pens, they await auction where if sold they'll be rehomed with owners who agree not to sell them for slaughter outside of the U.S.

According to Watt and other wild horse advocacy groups, those assurances don't always matter.

"The horses are supposed to be protected from slaughter," she continued, "But unfortunately, you put them in a trailer and cross the border into Canada or Mexico and they don't always check to see what's in the trailer."

The horses that come to the sanctuary are generally in "emergency situations," Watt said, which means the horses are being sent to slaughter or their previous caretaker died or is unable to take care of the horses.

In addition to preserving the herds of wild horses, Hyde envisioned the sanctuary as a means to protect and preserve the land's natural beauty and rich historical legacy, which includes long-ago remnants of human activity.

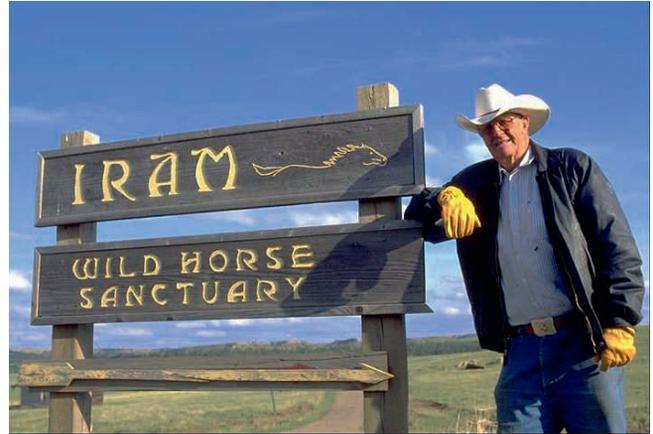

"This particular tract of land was the location for ancient petroglyph writings that ancient man did on cliff walls," Watt explained. "And we're protecting the pioneer history of this land; Our buildings that we use are pioneer homesteads."

Though Dayton Hyde passed away in 2018, his legacy lives on. Today the sanctuary is home to several hundred wild horses, a herd of cattle, thousands of acres of pristine prairie

and the inextinguishable spirit of the wild west.

"He used to say every ache and pain he ever had was from a horse," Watt laughed. "What Dayton Hyde really wanted was to protect this land from subdivision, to let it be for wildlife and wild horses, and keep it safe and protected. I think South Dakota should be immensely proud of what Dayton Hyde has done."

For more information about the Black Hills Wild Horse Sanctuary, visit www.wildmustangs.com.

The Vinyl Record Club at the Custer County Library meets once each month. Photo submitted by Custer County Library

CATALYST FOR COMMUNITY

Fun Awaits At Your Local Library!

Jacob Boyko

jacob.boyko@sdrea.coop

In honor of Dr. Seuss’s birthday, March is National Reading Month – and the best place to celebrate is at your local library. Whether you are into reading or are just looking for a fun weekday activity, your local library is sure to have something that interests you and your family. Stop in at your local library to learn about fun activities like the ones below!

Custer County Library – Vinyl Record Club, Seed Library, Letterboxing

As the snow melts and the first leaves of spring begin to unfurl, the Custer County Library transforms into a hub of inspiration for community gardeners of all skill levels. With engaging seminars and resources for everyone to enjoy, Custer’s library is the perfect place for community members of all ages to cultivate a love for gardening.

One of the library’s most beloved initiatives is the seed library, made possible by the contributions of the Custer Mile

High Garden Club. This unique resource invites visitors to explore a collection of seeds that they can use whether they’re growing vegetables in their garden or flowers on the kitchen counter.

Seeds are sorted by type, Myers explained, with sections dedicated to seeds you start indoors, seeds you start outdoors, root vegetables, leafy greens, flowers, herbs and so on.

The library also hosts educational seminars covering topics including hydroponics and sowing seeds in the wintertime.

“Master gardeners come to talk on related topics and we’ll have free plant clippings and free seed packets available for people to pick up,” Myers explained. “It just kind of kicks off our gardening season.”

Gardening isn’t the only thing bringing people together at the Custer County Library. The Vinyl Record Club transforms the library into a relaxing lounge where community members connect over their shared love of music.

“Everyone brings their favorite albums,

and you can play a song or two to share,” Librarian Sarah Myers explained. “We just saw it as a potential to bring people together and capture that interest of vinyl. It’s kind of fun to see different generations of people interacting together.”

Myers also promotes outdoor opportunities through a scavenger hunt activity called letterboxing.

Similar to geocaching – just without the coordinates – letterboxing requires players follow hints and clues about their surroundings. Myers prepares clues in a similar fashion to the one below that guides players to a cache on the Mickelson Trail.

“Park near search and rescue, ready for a quest. Walk toward Hill City, following the rest. From the little stop sign, take 220 steps on track. Search high and low for a quartz throne, no looking back. If you see the football field sign, you’ve gone too far. Take a seat on the throne, reach down, and there’s your star.”

From under benches to tucked between rocks, players scour the area for the hidden stamp to ink their logbooks and continue to the next step of their adventure.

“We love getting people outside,” Myers continued. “This was a way for families to have little mini adventures. Libraries

are more than just books – they’re a place where you can build community and find community.”

Madison Public Library – Chess Club, Trivia Night

In Madison, Librarian Lisa Martin keeps her community sharp with brain-building activities and clubs for people of all ages.

The library’s reach extends beyond its rows of books and walls; On Thursday nights, The Office Bar & Grill in downtown Madison transforms into a bustling trivia hotspot where the community tests their knowledge on an array of topics to lead their team to victory.

The library hosts five rounds of trivia. Participants can count on a round focused on current events, but the rest remain a surprise to keep everyone on their toes.

“Sometimes we do a theme to go along with a month,” Martin explained. “Last January, we decided to do “Dry January” where you try and go without drinking, but it was really just an excuse to have trivia about soda pop!”

The night’s winner receives a gift card to The Office Bar & Grill, but at the end of the year, the team with the most points walks away with a trophy.

The library also hosts a chess club, which Martin says attracts community members of all ages.

“It’s hard to get the boys in sometimes because they might not want to sit through things,” Martin said. “Chess club attracts that crowd, and we’ll have 10 guys sitting here anywhere from sixth grade to retirement talking to each other and teaching each other – sometimes smash talking – and it’s a lot of fun.”

Martin strives to offer something for everyone. Whether it’s inviting Lake Herman State Park rangers to demonstrate outdoor skills, holding puzzle competitions or hosting talented musicians, Madison Public Library will have something to get you involved.

Gregory Public Library – STEAM Club

At the Gregory Public Library, the Science, Technology, Engineering, Art, and Math (STEAM) Club, is working to spark children’s imaginations and show them opportunities for new

hobbies, or even future careers.

The after-school club focuses on hands-on lessons where students often have an active role in the experiment.

“We started off by inviting Sanford in and the kids were able to do an experiment where they extracted DNA from strawberries,” Librarian Tara Engel said of the early days of the club. “We’ve also used our LEGOs to introduce engineering, we’ve used a lot of art supplies, we’ll do chemistry experiments with microscopes – Our STEAM Club is really getting kids thinking and doing things in a different manner.”

One of the most popular initiatives has been the bridge construction lab, where students use recycled materials like cardboard tubes to construct different bridges and learn basic engineering concepts.

“We use some of our bridge and construction books in our nonfiction section as examples,” Engel explained. “Then we have them use cardboard, construction paper, straws and strings to try and hold their bridge up.”

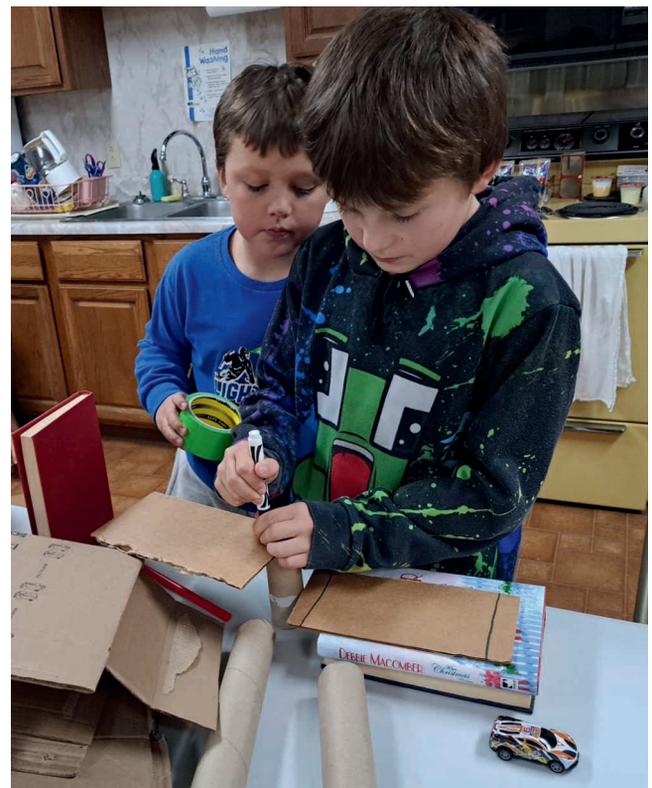

The moment of truth comes when the bridge’s structural soundness is tested by the weight of a Matchbox car driving across the deck.

The library also makes use of challenge cards for LEGOs, where students draw a card with a creation challenge and students ranging from making the tallest tower to building a musical instrument that makes a sound.

“It’s fun to see how the students come together to form teams and work together,” Engel said.

 Travel South Dakota*

To have your event listed on this page, send complete information, including date, event, place and contact to your local electric cooperative. Include your name, address and daytime telephone number. Information must be submitted at least eight weeks prior to your event. Please call ahead to confirm date, time and location of event.

FEB. 28-MARCH 1
Mardi Gras Weekend
 8 p.m. Fri.-10 p.m. Sat.
 Main Street
 Deadwood, SD
 605-578-1876

MARCH 6
SD Jazz Festival Concert
 Aberdeen Community Concert
 Association
 7:30 p.m.
 NSU Johnson Fine Arts Center
 Aberdeen, SD
 Tickets Available at Concert

MARCH 8-9
Philip Area Annual Gun Show
 Sat. 9 a.m.-5 p.m.
 Sun. 9 a.m.-3 p.m.
 American Legion Hall
 Philip, SD
 605-859-2135

MARCH 8
Epiphany Sausage Sale
 10 a.m. until gone
 Parish Hall
 Epiphany, SD

MARCH 8
Minnehaha County
Pheasants Forever Banquet
 5 p.m.
 El Riad Shrine
 Sioux Falls, SD
 605-376-8219

MARCH 14-15
Badlands Quilter Weekend
Getaway
 Fri. 5 p.m.
 Sat. 8 a.m.
 Community Center
 Wall, SD
 605-685-5718

MARCH 15
VFW Teener Baseball Bingo
Benefit
 5 p.m.
 Tyndall Auditorium
 Tyndall, SD

MARCH 22
Annual Banquet & Bash
 Britton Area Chamber of
 Commerce
 5:30 p.m.
 Britton, SD
 605-448-8130

MARCH 26
Hill City Garden Club
Trip to Central Asia
 1 p.m.
 Kathryn Cleveland
 Hill City Super 8
 Hill City, SD

MARCH 29
Ready. Set. Grow!
 9 a.m.-12 p.m.
 Couteau Prairie Master Gardeners
 Codrington CTY Extension Complex
 Watertown, SD
 605-838-7098

APRIL 4
Mitchell Technical College
2025 Alumni Gathering
Cornhole Tournament
 5 p.m. Social
 6:30 p.m. Tournament
 The World's Only Corn Palace
 Mitchell, SD
 605-995-7342

APRIL 4-5
Annual Schmeckfest
 German Heritage Celebration
 748 S Main St.
 Freeman, SD
